

Rambler

AI Video Captioning Agent • Gemma 4 31B via Fireworks AI

Omnix • Abdelrahman Amr Ahmed Abdullah • AMD Hackathon Track 2

POWERED BY GOOGLE GEMMA 4 31B & FIREWORKS AI

01. The Problem & Solution

■ The Problem: Flat & Static Captions

- Traditional captions are dry, static, and context-blind.
- Static language models lack timing and cannot grasp comedic nuances, sarcasm, or tech humor.
- Standard video tools lack validation, leaving hallucinations and typos in output.
- Cloud API requirements compromise data privacy and lead to unpredictable network latencies.

■ The Solution: Multi-Agent Cascade

- Rambler uses a single Gemma 4 31B model for Ingestion, Multimodal Perception, and Styling.
- Automatically generates 4 tailored voices: Formal, Sarcastic, Tech Humor, and Fun/Everyday.
- Runs a Gemma-powered self-critique/eval loop that automatically refines low-scoring lines.
- Cloud inference via Fireworks AI API for scalable, reliable performance.

02. Technical Architecture

03. Technology Stack & Fireworks AI

■ Gemma 4 31B Model

- gemma-4-31b-it
Single multimodal model for ALL pipeline stages.
- Handles perception, styling, evaluation, and self-correction loops.

■ Fireworks AI API

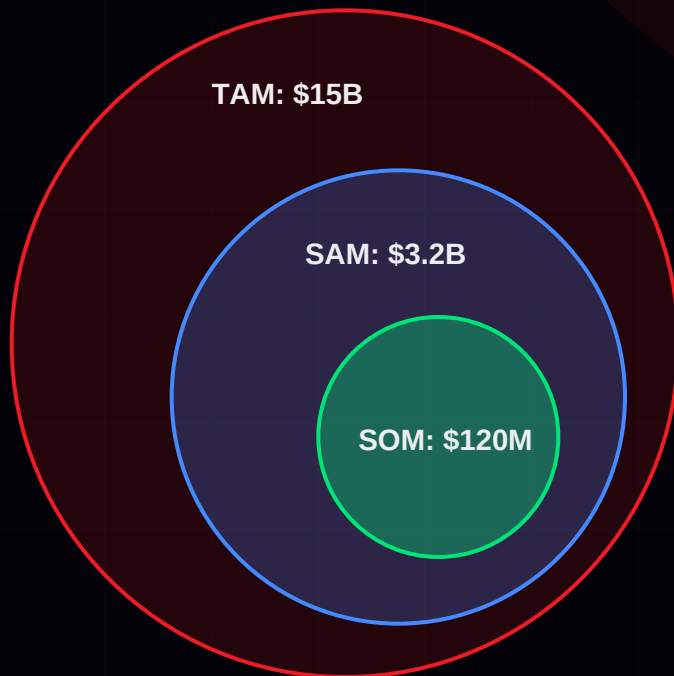

- Cloud-hosted inference
Scalable, reliable model serving via Fireworks AI.
- OpenAI-compatible API
Standard chat completions with multimodal support.

■ Docker Runtime

- Submission Dockerfile
Auto-detects batch task mode or Streamlit web view.
- Lightweight CPU image
GPU inference handled by Fireworks AI cloud API.

```
$ docker run -e FIREWORKS_API_KEY=<key> -v ${PWD}/input:/input -v ${PWD}/output:/output rambler:latest
```

04. Market Potential & Revenue

Market Opportunity (TAM/SAM/SOM)

- Total Addressable Market (TAM): \$15B Creator economy and Video AI SaaS
- Serviceable Addressable Market (SAM): \$3.2B B2B localization/caching APIs
- Serviceable Obtainable Market (SOM): \$120M Tech & developer channels

Revenue Model & Projected Splits:

SaaS Subscriptions (45%)		\$15-\$49/mo
Enterprise API (35%)		\$0.02/min
Brand Tuning Packs (20%)		Custom LoRA

05. Competitive Advantage

Feature	Standard Auto-Cap	Whisper Speech	Claude Text-Only	RAMBLER
Multimodal Fusion (A+V)	☐ Visual Only	☐ Audio Only	☐ No Video	☒ Integrated (A+V)
Diverse Brand Styles	☐ Single Style	☐ Transcribe Only	☒ Can Style	☒ 4 Diverse Styles
Evaluation & Correction	☐ No Evaluation	☐ No Correction	☐ Manual	☒ Auto-Self-Correction
Cloud API + Docker	☐ Limited Hosting	☒ Local Option	☐ Public Cloud Only	☒ Fireworks AI + Docker

06. Future Outlook & Scaling

1. Real-Time Streaming

- Live Broadcast Captions
Stream segment processing for sub-second live feeds.
- Audio Sync Anchoring
Automatic timestamp alignment using Whisper timestamps.

2. Custom Voice Adaption

- LoRA Adapters
Brands upload lightweight fine-tuned adapters for highly bespoke humor styles.
- Collaborative Editor
Manual correction triggers reinforcement learning.

3. Scaled Cloud Deployment

- Batch Processing
Parallel video tasks across cloud API endpoints.
- Model Upgrades
Seamlessly swap to newer Gemma models as they become available.
